PROPOSED FOR: INTOUCH

12 April 2023

ABOUT THE MOBILE APPLICATION

My plan is to create a platform where the public can share their problems related to GBV, Mental Health, Health Problems, Relationship problems, Financial Problems, Cyber bullying, Teenage pregnancy etc and get guidance/assistance/advice from the public.

The public should also be able to comment on comments.

NB: People who post their problems must remain anonymous.

NB: People must be able to post their problems with a voice note and the public must also be able to comment on this posts with voice clips.

Name of the Mobile Application: **TALK TO US**

The Application should be available on Playstore for Android and iOS for iphone devices.

ALSO CREATE A WEBSITE FOR THIS PLATFORM

HOW THE MOBILE APPLICATION WILL WORK

CREATING A PROFILE

NB: People who want to post their problems or offer advice, solutions to these problems **HAVE TO CREATE A PROFILE with their name, surname, Age and cellphone number.**

We will use an SMS verification system to create a profile. Users should also create a password for their profiles.

WHEN YOU OPEN THE APPLICATION

When you open the mobile application you will see the name of the App “TALK TO US” for 3 seconds.

After that a screen with the Names and logos of all the sponsors will pop up for 5 seconds.

After that, a screen with all the categories of problems will show up:

1. Gender Based Violence
2. Mental Health problems
3. Relationship problems
4. Health Problems
5. Mental Health Problems
6. Financial problem
7. Cyber bullying
8. Teenage pregnancy
9. Other problem (under this category, people will list problems such as Family problems, property problems,

EXAMPLE: When you enter the **Gender Based Violence** category, the Following options will appear.

- About GBV
 - What is GBV
 - Causes of GBV
 - Effects of GBV
 - Types of GBV
 - How to prevent GBV
 - Consequences of GBV
- Talk to an expert
Under “talk to an expert” we will list contact details of social workers, psychologists, Namibian police and private companies that can help with GBV issues.
- Talk to the public
 - The public will post their problems related to GBV. The public will then comment on these problems/posts with solutions, advice.

REPORT FEATURE

To avoid sensitive, offensive posts and comments, the Application should have a **REPORT** option on each post and comment. Once one person reports a post or comment, we will get a notification and decide to delete or keep the post.

SCROLL DOWN

Develop an Admin platform with the following functions:

1. View reported posts and comments with an option to delete them
2. View the number of users signed up on the platform
3. Ability to view users profiles (their name, age and cellphone number)
4. We must be able to upload and edit content on the app and website and add or remove contact details under "Talk to an expert".
5. People should also be able to switch on notifications; meaning they will be notified once someone posts a problem in any category their interested in.
