# ELECTRICITY REPORT

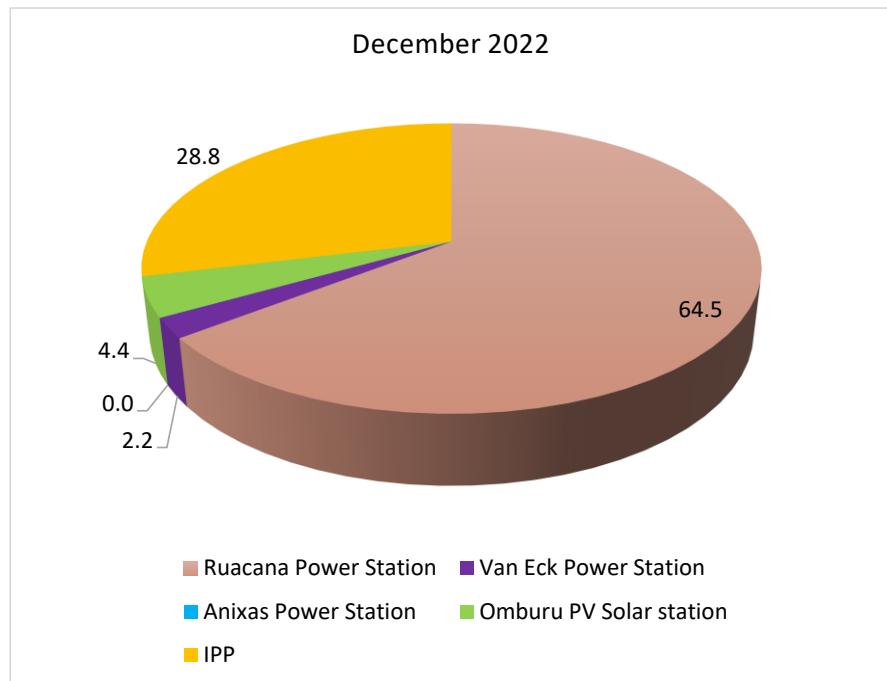

DECEMBER 202

**Chart 1: Electricity Sources Composite Index, Percent**

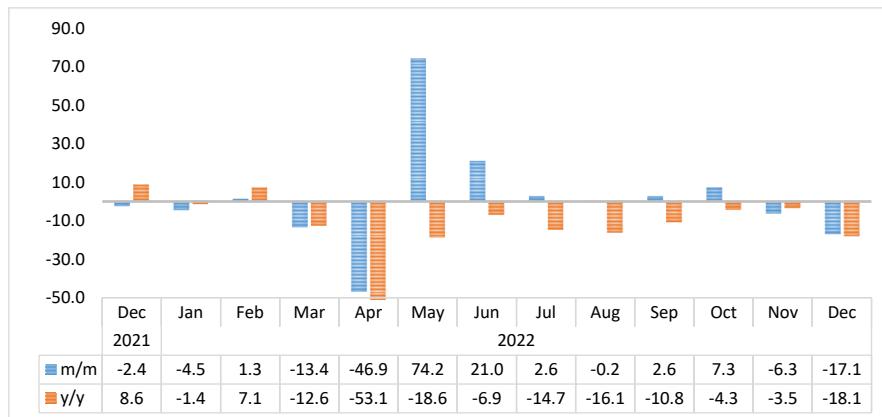

- The **Electricity Sources Composite Index**, which is composed of own generation (local production) and imported electricity for the month of December 2022, posted a marginal increase of 0.1 percent compared to a decline of 2.6 percent recorded during the preceding month. While, on yearly basis, the index recorded a decline of 0.6 percent.
- The monthly increase was derived from local generation of electricity which recorded an increase of 49.9 percent.

**Chart 2: Contribution of Sources to Own Generation, Percent**

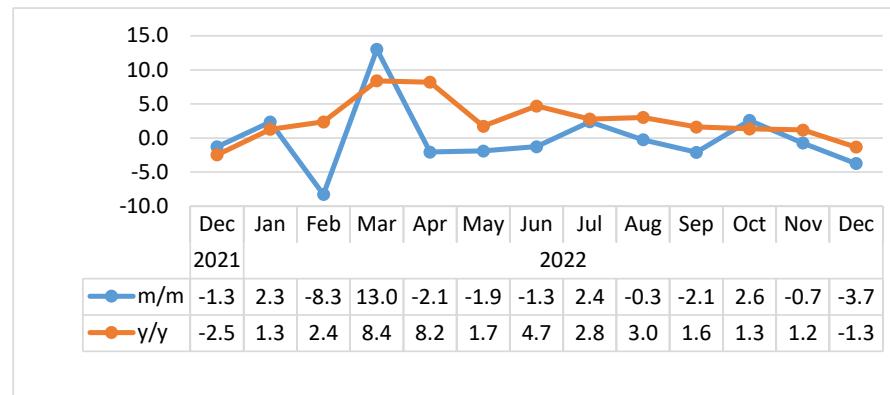

- The local production of electricity for December 2022 stood at 134 559 MWh. Ruacana power station produced 86 832 MWh (64.5 %) while the Independent Power Producers (IPP) collectively generated 38 781 MWh (28.8%) of electricity.

**Chart 3: Electricity Import Index, Percent**

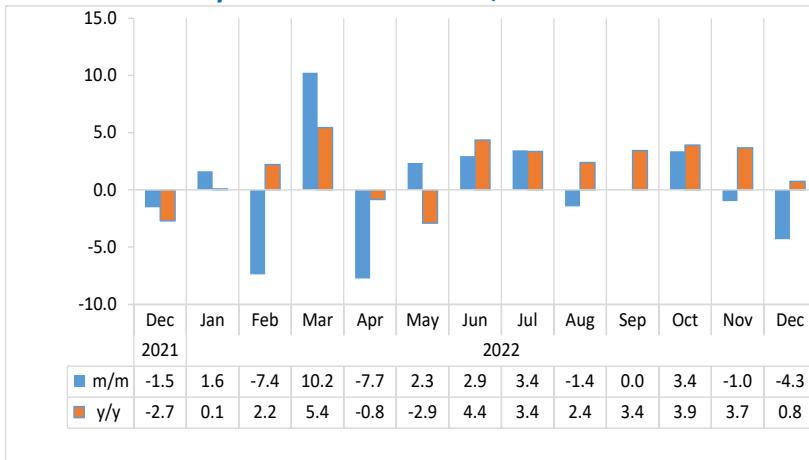

- The **Electricity Import Index** recorded a decline of 17.1 percent in December 2022, a deterioration when compared to a decline of 6.3 percent that was recorded in November 2022. Additionally, on an annual basis the index declined by 18.1 percent.
- A total of 216 217 MWh of electricity was imported during December 2022. Electricity was mainly sourced from Zesco in Zambia (61.0%), followed by ZPC-Zimbabwe (14.2%) and Eskom Aggeneis – South Africa (13.1%).

**Chart 4: Electricity Sales Composite Index, Percent**

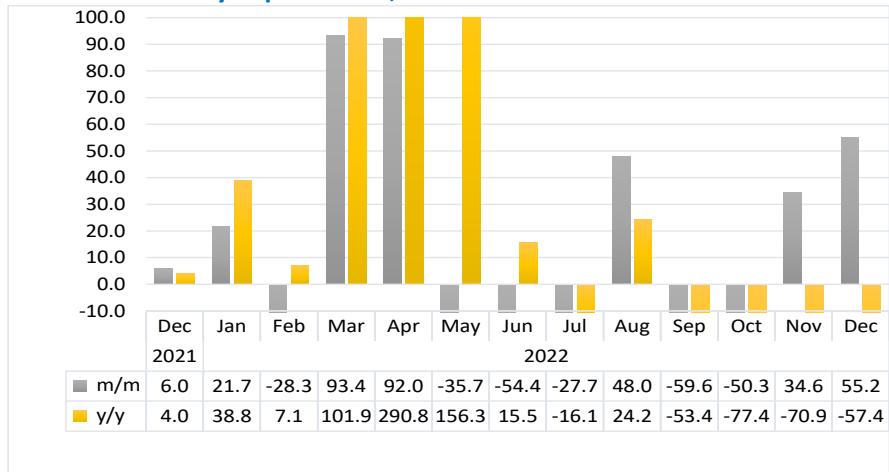

- The **Electricity Sales Composite Index** for December 2022 recorded a monthly decline of 3.7 percent, compared to a decline of 0.7 percent recorded in November 2022. Moreover, annually the index recorded a reduction of 1.3 percent. The monthly decline in the index resulted from a reduction in domestic sales.

**Chart 5: Electricity Domestic Sales Index, Percent**

**Chart 6: Electricity Export Index, Percent<sup>1</sup>**

- The **Electricity Domestic Sales Index** in December 2022 declined by 4.3 percent month on month down from 1.0 percent registered a month earlier. The index registered a marginal increase of 0.8 percent on an annual basis.
- Electricity was mainly sold to Redistributors - LPU (66.9%) and Mining (24.0%) on the domestic market, while Eskom Orange River obtained a share of 3.8 percent.
- The total amount of electricity sold locally declined from 310 318 MWh recorded during November 2022 to 296 953 MWh recorded during the period under review. Whereas 294 724 MWh of electricity was sold in the corresponding period of 2021.

- The **Export Sales Index** increased by 55.2 percent in December 2022, compared to an increase of 34.6 percent registered a month earlier. However, the index declined by 57.4 percent yearly.
- In the month of December 2022, Namibia exported a total of 4 671 MWh of electricity of which 39.4 percent was supplied to STEM Sales-SAPP, followed by Botswana (37.6%) while 12.4 percent of export was destined to South Africa.

<sup>1</sup> This graph is limited to -10 percent and 20 percent for better presentation.

**Methodology :** Graphical and tabular analysis

**Data Sources :** The data source for the volume of electricity is sourced from Nam-power. These are data on domestic and export sale, Own Generation and import sources. The Production is in kilowatts per hour (kWh) for all the variables.

**Index calculation:** The index of sales and sources weighted uses the volume data of 2015.

**Conversion :** 1 basis point = 0.01 percent
